

Editing Area

The selected remote page will be displayed in the editing area and can be modified individually.

To design the remote page you can place the following general remote elements on the page:

- Smart Widgets
- Button
- Image
- Textfield
- Date and Time
- Slider
- Roundslider
- Analogmeter
- Camera
- Webpage
- Color Picker
- Selection

Additionally there are also some special **remote elements**, which are plugin-bound and are only available, if the respective plugin is activated. **group elements** are groups made of single elements which are usually used in groups (e.g. numberblocks or control pad).

You can assign properties and function to any added element via properties menu.
