

Import IR-devices from Creator Flex-/ HM

It is possible to import the infrared codes stored in Creator Flex or HM device after device. To import a device follow the steps below:

1. Go to the NEO Device Manager and add a new device
2. Select your AIO GATEWAY as gateway and then Type "IR/ RF Code"
3. Save the device
4. The left button below the codes box (folder icon) opens the import menu

Name: Fernseher

Gateway: GATEWAY

AIO GATEWAY

Type: IR/RF Code

Sub Type: switch

Send IR from: Internal blaster (IR:01)

Codes

Import IR codes

Remove

Save

5. Now select the ircodes.xml of your Creator Flex / HM
6. Select a device from the device list
8. To import all IR-codes of this device click "Apply".
