

## General

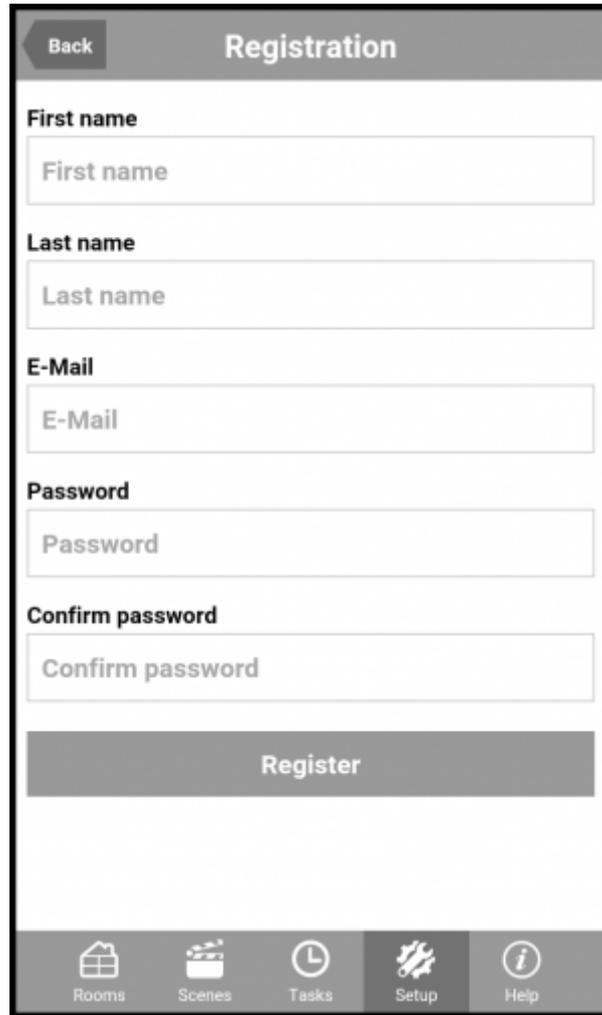

Since version 1.51 IQONTROL provides an account functionality. With an account it is possible to save, load and delete several configurations.

## Registration

If you have already an AIO Creator NEO account then you can use this account in IQONTROL too. Otherwise you have to create a new account. To create an account you have to go to "Setup" and then tap on "Account".

By tapping on "Register" you can create an account. After filling in all forms you have to tap on "Register".

A screenshot of a mobile application registration screen. At the top, there is a grey header with a 'Back' button on the left and the title 'Registration' in the center. Below the header, there are five input fields, each with a label above it: 'First name', 'Last name', 'E-Mail', 'Password', and 'Confirm password'. Each field contains a placeholder text matching its label. Below the input fields is a large grey button labeled 'Register'. At the bottom of the screen is a navigation bar with five icons and their corresponding labels: 'Rooms' (house icon), 'Scenes' (filmstrip icon), 'Tasks' (clock icon), 'Setup' (wrench icon), and 'Help' (info icon).

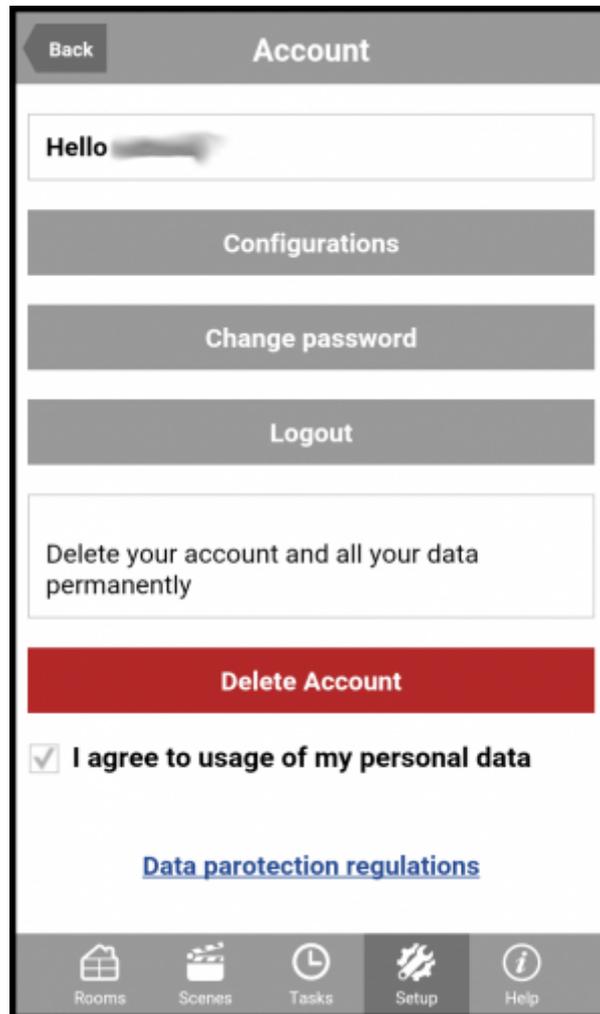

**Attention: The password must have at least 6 characters**

Once you have tapped on register you will automatically receive an e-mail to activate your account. This activation is compulsory.

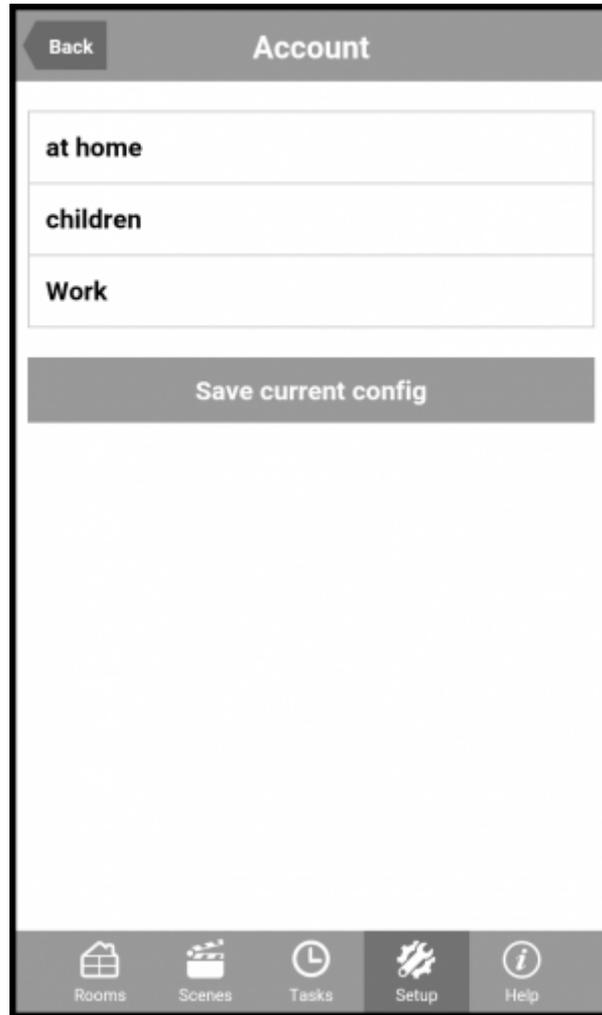

**Attention: If you did not receive an e-mail, please check your spam-folder.**

**Login**

After your registration has been successful it is now possible to log into your account. For this purpose you have to go to "Setup" → "Account" and then type in your e-mail-address and password. By tapping on "Login" you will log into your account.

By tapping on “Configurations” you can now see, save and load your current configuration.

### Save configuration

To save your current configuration simply tap on “Save current config”. A new dialog will appear where you have to enter a name and a password for you configuration. The password is used to encrypt your config and to store it encrypted on the server.

**Attention: Configurations with the same name will be automatically overwritten!**

Back Save configuration

**Attention!**  
Your configuration will be encrypted using a password before it is stored in the cloud.  
**If the password is lost your configuration cannot be restored!**

Save configuration

Rooms Scenes Tasks Setup Help

**Important note: The password is necessary for the decryption of your configuration. If you lose your password you can not restore your config.**

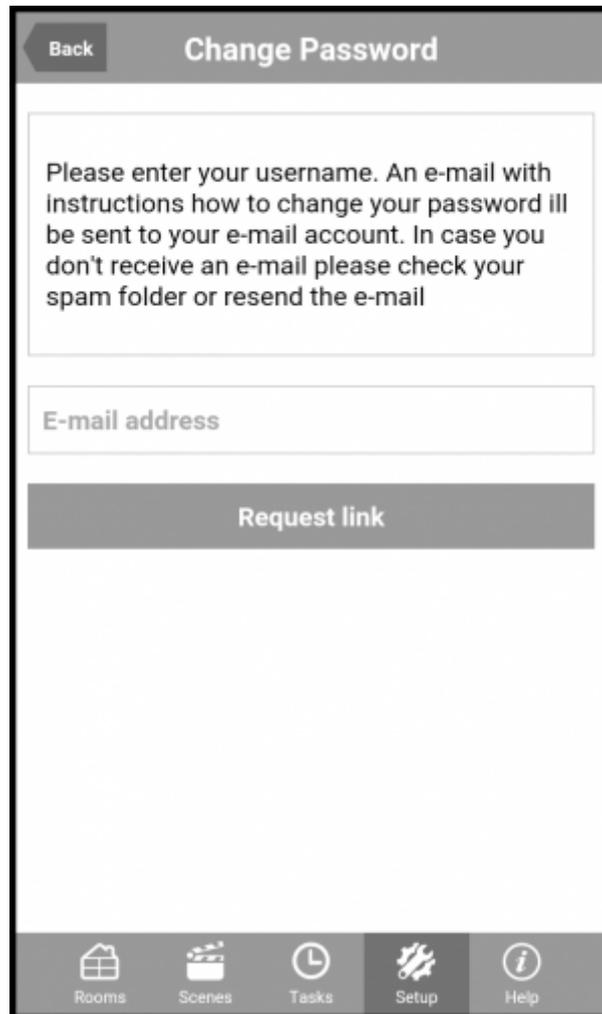

### Load and delete configuration

To load or delete a configuration you have to select the config you want to load or edit at the Configselection. Now you have to enter you password. If the password was correct your config will be loaded. To delete your config you have to tap on "Delete configuration".

### Forgot password

If you have forgotten your password you can request a new one by tapping the button "Request link".

Once you have entered your e-mail-address you will receive a link to reset your password.

**Attention: If you haven't received an e-mail please check your spam-folder or request a new e-mail.**
