

Integrate IP cameras

In IQONTROL NEO you can also integrate some IP camera models. Which models are currently compatible can be found on our [Compatibility List](#).

The cameras are connected as a cloud system via the Ivideon Cloud account. Therefore, please set up your camera first with the Ivideon app (not the Oco App !). The app will guide you step by step through the integration process.

Now the camera can be integrated as a cloud device. For more information how to integrate cloud devices check the chapter [Add cloud devices](#).
