

Set up push messages for your mobile device

To receive push messages from tasks on your mobile device, you must first set up your mobile device for push messages. You can do this directly in IQONTROL NEO.

To do the set up go to *main menu* -> *account* and tap *push devices* .

You can save your mobile device as a push device by tapping the *Save this device* button.

Now you can enter a name for the push device and finally tap *Save*.

If you do not want to use your mobile device for push messages any longer, got to *main menu* -> *account* -> *push devices* and tap the device you want to delete. Then tap *Delete push device* .
