Quick Reference Möhlenhoff Alpha 2 Plugin

Integrate Möhlenhoff Alpha 2 Base Unit

If you are using the AIO CREATOR NEO with a Möhlenhoff Alpha 2 plug-in, you can integrate the Möhlenhoff Alpha 2 Base RF Controller as a gateway in the device manager. For this purpose click the „new gateway" button. Now enter a name, select the type (Möhlenhoff Alpha 2) and enter IP-address, Port-Number and - if necessary - User and Password.

Import devices from gateways

For various gateways (i.e. Homematic CCU, hue bridge, netatmo central unit, Rademacher Homepilot, ...) you can automatically import their connected devices / components into the NEO Device Manager. To do this, click the button "Import devices".

A menu opens, where you have to select the specific gateway. Then the connected devices are detected and listed so that you can check the boxes of all devices you want to import.

Please note: Devices only can be imported automatically, if they are connected to the same subnet as the computer on which the AIO CREATOR NEO software is running. If the gateway is not detected automatically, you can integrate it manually by clicking the button "New device" in Device Manager and enter the settings of your gateway.
